

# AP Vieth LP Project Overview

## Tunnel Oil & Gas Funds Overview *Your Tunnel to Industry Energy Investing*

Tunnel combines digital information innovations with vast oil and gas operational and investment expertise to democratize direct oil and gas investing.

### Well Summary

Taking many factors into consideration like production profiles of wells in the field, under-simulated and undeveloped pay behind pipe, potential production improvement from secondary recovery, and remaining reserves in the Vieth 5, it would not be unreasonable to believe 30,000-70,000 bbls of oil can be economically recovered from all pay zones in this project. **Completed 6/2019**

### Key Well Stats

#### Location

Archer County, TX

#### Well Type

Conventional  
Prod. Acquisition

#### Basin

Fort Worth Basin  
North Central TX

#### Formations

Mississippian &  
Caddo lime

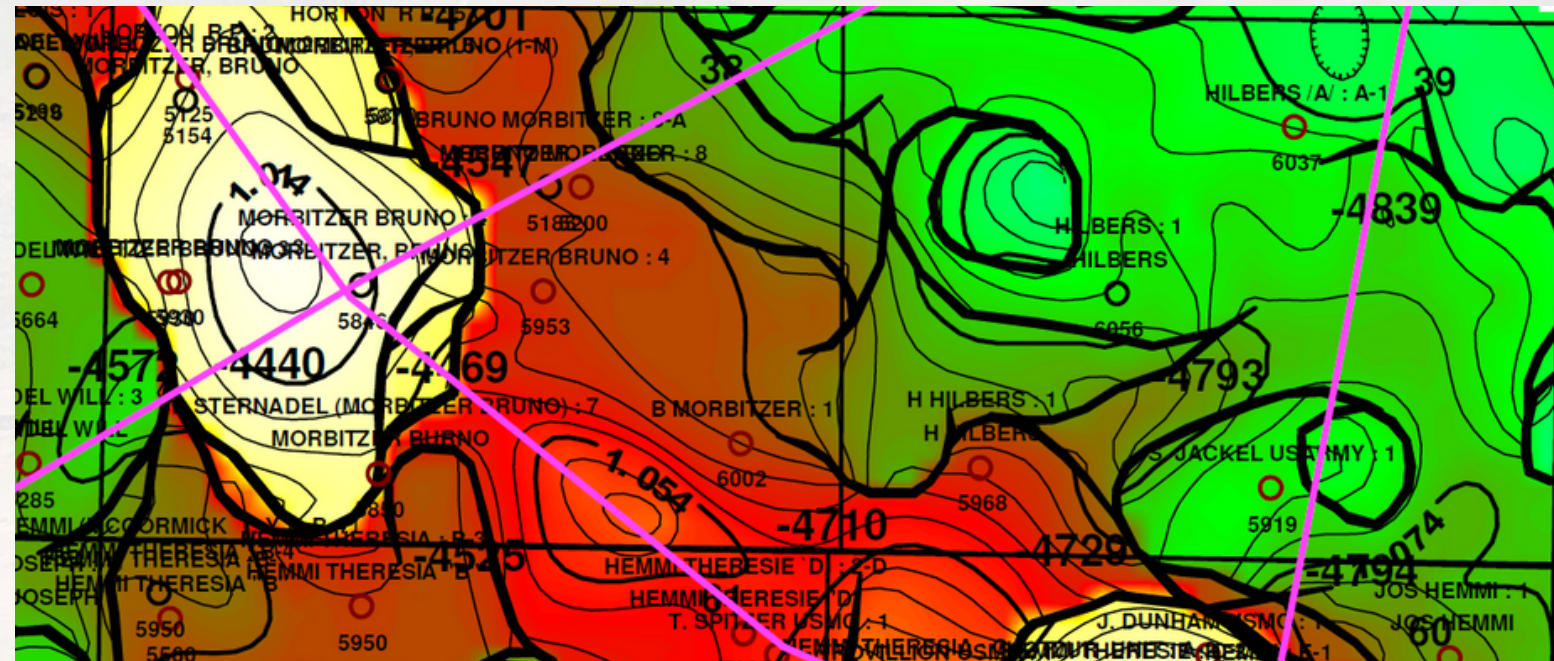

#### Depth

5000 FT

#### API number

42-009-01578

### Financial Performance as of 10/14/2022

Total Investment:	\$405,000
Total Return:	\$111,083
Last 3 months net cash flow:	\$27,031
Total Production:	4,903 bbls oil
Current Production:	5 bpd
