

J. Fite LP Project Overview

Tunnel Oil & Gas Funds Overview *Your Tunnel to Industry Energy Investing*

Tunnel combines digital information innovations with vast oil and gas operational and investment expertise to democratize direct oil and gas investing.

Well Summary

The J. Fite well will be located when the seismic data is finalized but is expected to be on the east flank of a Mississippian reef. This location is on the upthrown east flank of the reef that is over 400 feet thick, one of the thickest in the Ft Worth Basin. The J. Fite LP will acquire the producing Morbitzer lease, shoot and process 3D seismic, and drill the new J. Fite well. **Completed 7/2020.**

Key Well Stats

Location

Archer County, TX

Well Type

Conventional

Basin

Fort Worth Basin
North Central TX

Formations

Mississippian &
Caddo lime

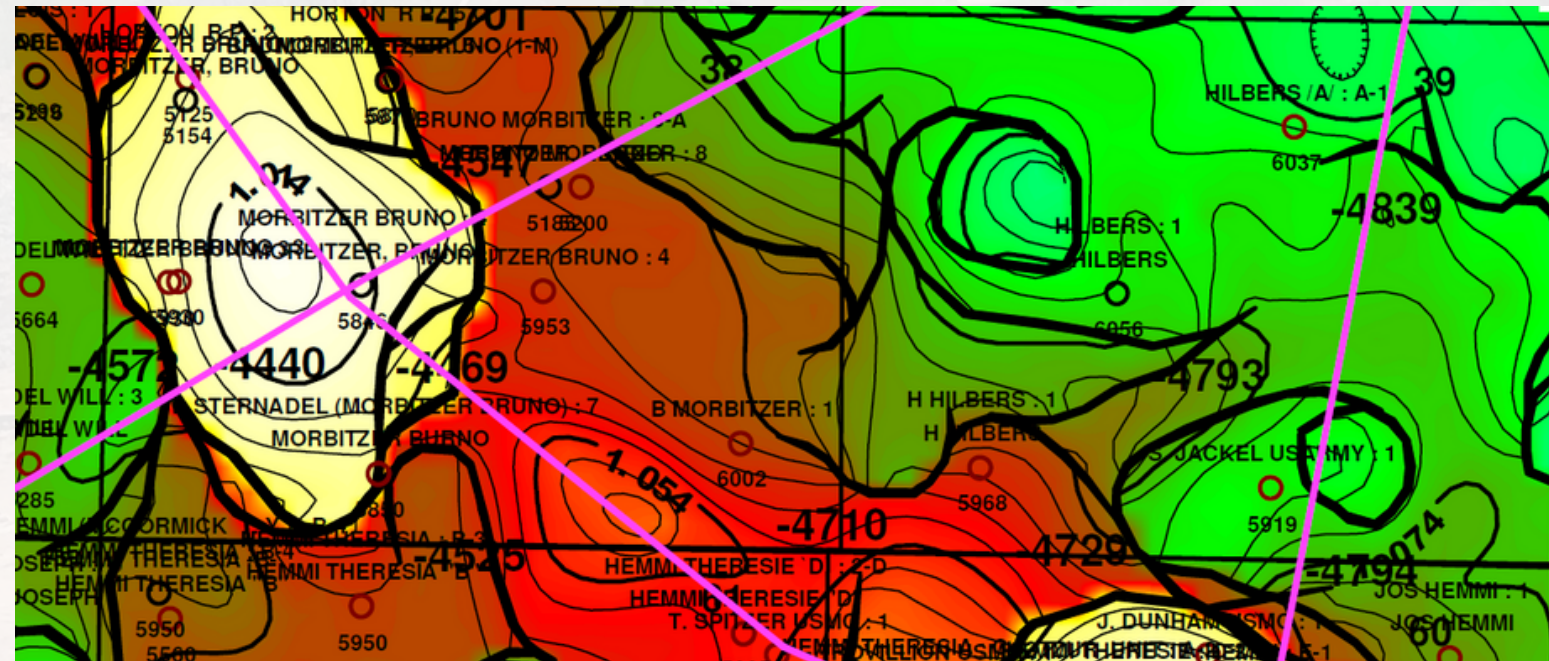

Depth

6000 FT

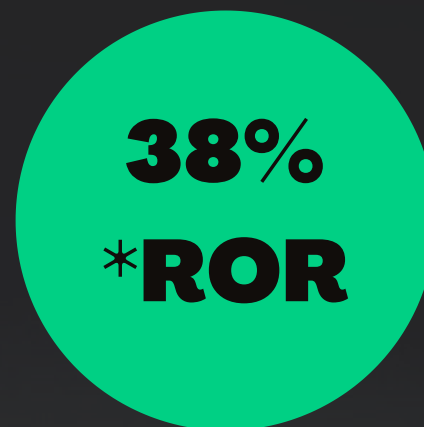

API number

42-009-43253

Financial Performance as of 10/14/2022

Total Investment:	\$1,400,000
Total Return:	\$301,000
Last 3 months net cash flow:	\$133,446
Total Production:	6,859 bbls oil
Current Production:	22 bpd
